REPAIRS TO NH ROUTE 16 BRIDGE OVER SACO RIVER IN CONWAY
DECK WORK WILL REQUIRE SINGLE LANE TRAFFIC FOR TWO WEEKS

The New Hampshire Department of Transportation announces bridge repairs are scheduled to begin Wednesday, September 8, 2004 to the NH Route 16 Bridge over the Saco River in Conway.

This bridge deck patching and paving work is expected to take two weeks to complete and will require one lane of alternating traffic. Warning signs, concrete barriers and temporary traffic signals will guide vehicles through the work zone.

Motorists should use caution when driving through the work zone. Minor delays can be expected. In the event of inclement weather, work will be postponed until the following workday.
